

Clean Energy Shopping Game

1. In 15 seconds, stack as many pennies as you can into a single tower with your non-dominant hand.
2. Draw a number of cards equal to the number of pennies successfully stacked. Each card will have a specific dollar amount on it. (\$100, \$500, \$1000, or \$10,000)
3. Each card can be exchanged for one (pretend) item of equal or lesser value on the shopping list.
4. Items **cannot** be bundled to trade for a single card. However, cards **can** be bundled to trade for a single item.
5. Each item has a point value associated with it. If you reach 100 points, you win a piece of candy.
6. This game is more fun if you focus on items of actual interest to you.
7. To join our Hall of Fame for total points, please write your name, items selected, and total points on a sticky note.
8. Have fun, and be curious!
9. Please complete our survey before you go.

Item	Cost Range	Sample Card Combinations	POINTS
LED Light Bulbs	\$1-\$3 each	\$100	5
